 1 x Small Silicone Tube Brush - 6 x 241mm

Product Description:

Clean and care for your maternity and baby gear with Haakaa's Silicone Cleaning Brush Kit! This set comes with three different brushes to help you efficiently scrub all your essentials, leaving them clean and ready to reuse. Our Double-Ended Silicone Brush features soft and flexible silicone bristles that provide a 360° clean for all your items. One end features a brush head for scrubbing your pumps, bottles and Milk Storage Bags, while the other head has a tapered tip to reach the small, tight corners of your bottle teats, Ladybug Milk Collectors and more! This kit also comes with two different-sized Silicone Tube Brushes, with soft edges to help you thoroughly clean the inside of narrow openings – such as reusable straws, Colostrum Collectors and dummies.

Features:

- Multi-purpose brushes efficiently clean everything, from baby and maternity gear to everyday household items!
- Soft silicone bristles effectively scrub those hard-to-reach corners, providing a 360° clean.
- Three different brushes allow you to clean both large and small items.
- Easy to use and clean – simply boil to sterilise!
- Easy-grip handles that hang up for convenient storage and drying to help prevent mould.
- Made of durable food-grade silicone and high-quality stainless steel.
- BPA, PVC and phthalate-free.

Cleaning and Care:

To clean the brushes, wash in warm, soapy water then rinse and dry thoroughly. Sterilise by boiling in water for 2-3 minutes. Let water cool then use tongs to remove brushes to avoid burns. Brushes are **NOT** suitable for sterilising in microwaves or sterilisers. Do not use any bleach-based cleaners or tablets to clean or sterilise your Haakaa products. Ensure they are dried thoroughly in a well-ventilated area. Store in a cool, dry place and avoid direct sunlight.

Double-Ended Silicone Brush
